Stimulus Scenario / Stem (Uddipak)
An unseen real-world situation, numerical table, experimental apparatus, or circuit diagram. Provides authentic contextual parameters to synthesize.
Part (a) Knowledge (Gyan) | 1 Mark
Direct factual recall from the NCTB textbook. Independent of the stem.
Bloom Level 1: Remember
Direct textbook retrieval
Scoring: 1/1 (Correct fact)
Part (b) Comprehension (Anudhabon) | 2 Marks
Conceptual explanation in student's own words. Independent of the stem.
Bloom Level 2: Understand
Relational explanation
Scoring: 2/2 (Concept + rationale)
Part (c) Application (Proyog) | 3 Marks
Apply core formulas to the scenario data provided in the stimulus stem.
Bloom Level 3: Apply
Procedural execution with stem
Scoring: 3/3 (Formula + calc + units)
Part (d) Higher-Order Thinking (Uchchotoro Dokkhota) | 4 Marks
Critical evaluation, hypothesis verification, multi-step mathematical derivation.
Bloom Levels 4–6: Analyze/Evaluate
Critique, evaluate, deduce
Scoring: 4/4 (Claim + multi-step proof)
